103-Decibel Siren

Wall Mountable Weather Resistant Housing

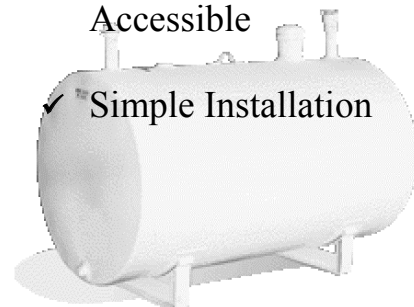

Optional Transformer

The Sentry Wall Mount Tank Alarm is a 2-piece unit that allows the control panel to be mounted indoors i.e., next to pump, office, etc. and connected to the tank sensor using common speaker wire. It is designed and engineered for use on most single or double walled aboveground tanks and is primarily used to help prevent costly and unnecessary tank overflows or bulk product shortages of such fluids as oils, waste oils, antifreeze, water and liquids with a low flash point. The Sentry Wall Mount is also ideal for monitoring interstitial space as well. This low cost unit is simple to install in a 2" tank bung and easily maintained on-site. When activated to an alarm condition, the Sentry will sound its 103-decibel siren for up to 4 days on a fresh 9-volt battery. The Sentry is a simple solution for remote areas where AC power is not accessible.

- ✓ Avoid Costly Overflows or Untimely Inventory Shortages
- ✓ Common 9-Volt Battery Operated or Upgradeable to AC Power
- ✓ Alarm Sounds Up to 4 Days On a Fresh Battery
- ✓ Ideal For Remote Areas Where AC Power is Not Accessible
